Bird Seed Mixes: About Our Brand

Drs. Foster & Smith Educational Staff

When you feed your wild birds Drs. Foster and Smith seeds, you can be sure that you are offering premium ingredients to draw more birds to your yard with less waste. It has been estimated that humans provide over 30 million tons of seed for wild birds each year. Although some birds can be gluttons, many are fussy, too.

In order to establish a wild bird haven in your yard, it is important to get the most out of the seed you offer. The type of seed you present along with the freshness and cleanliness of seed is very important. In order to maximize your wild bird experience, consider the following important factors:

- **Is the seed fresh and clean?** Our seed is triple cleaned to remove as much dirt, dust, and debris as possible to reduce the threat of seed contamination. Then, the seed is packaged fresh.
- **Are you getting your money's worth?** Our special Economy Waste-Free Seed Mix, Waste-Free Fine Sunflower Chips, and our Premium Waste-Free Total Cuisine are completely hull-less, to leave your lawn or deck less messy and to keep unwanted sunflower or corn plants from sprouting. These mixes are economical, since you are not paying for uneaten hulls.
- **Is the seed mix bird-specific?** You can attract more variety if you cater to the needs

of specific species. Many of our seed mixes are bird specific, such as our Finch Seed Mix or our hard-to-resist Cardinal Seed Mix.

- **Field tested?** All our seed is field tested and approved. The birdseed mixes that carry the Drs. Foster and Smith name are created with strict standards and carry our personal stamp of approval.

Drs. Foster and Smith Wild Bird Seed is made with superior ingredients to offer your backyard visitors unparalleled nutrition and health!
