16 Screws 1-1/4"

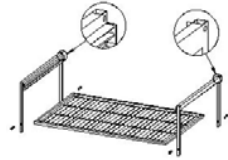

1 Allen Wrench

#### Step 1:

Assemble the Wire Stand Grill to Left Leg Stand and Right Leg Stand, and secure with screws.

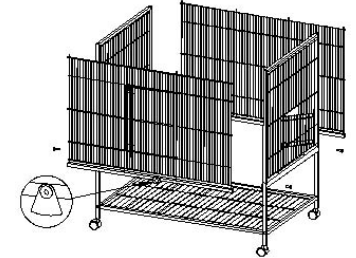

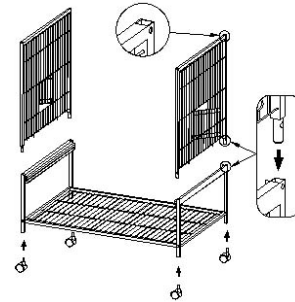

Note: (a) The channel of Leg Stand always needs to be inward. (b) The metal tab of Leg Stand always needs to be in the back of cage.

#### Step 2:

- (1) Attach 4 Rolling Casters into each of the legs.
- (2) Insert Bottom Side Panels into the Bottom Stand.

Note: There is only one door in the Bottom Side Panel; the door always need to be outward, and the top of tube has a hole on it.

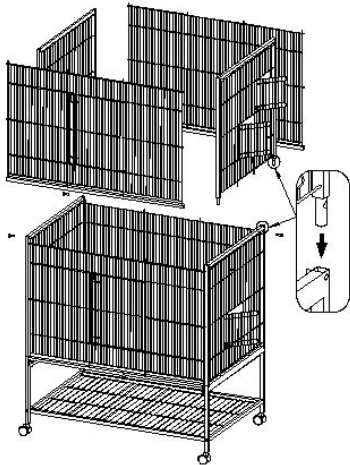

Step 3: Attach the Bottom Front Panel and Bottom Back Panel, and secure with screws.  
Note: (a) There is one wind-bell lock on the bottom of the Bottom Front Panel. (b) The Top & Bottom Back Panels are the same.

#### Step 4:

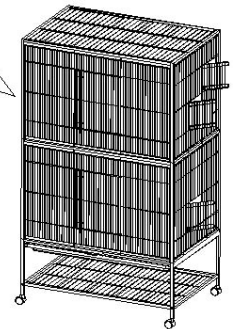

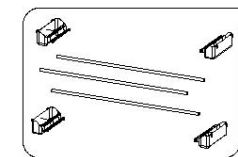

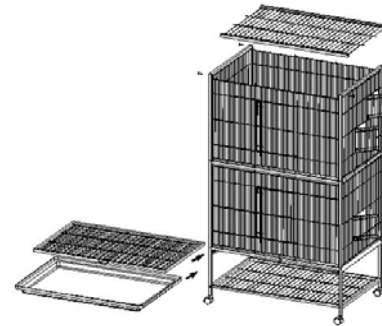

Same procedure as Step 2 and 3, insert the Top Side Panels, Top Front Panel and Back Panel, and secure with screws.

Note: (a) There are two doors in the Top Side Panel; and the doors always need to be outward. (b) There is no wind-bell lock on the Top Front Panel.

#### Step 5:

- (1) Assemble the Top Panel, and secure with screws.
- (2) Slide in the Wire Grill and Plastic Tray as shown.

#### Step 6:

Put cups and perches into position.

Now, your new aviary is ready for use.
