# Product Highlight: Mag-Flip Aquarium Algae Cleaner

*Drs. Foster & Smith Educational Staff*

Do you have aquarium algae that's tough to remove? If so, the Mag-Flip Aquarium Algae Cleaner is the answer to your problem.

## why mag-flip

Like traditional magnetic cleaners, the Mag-Flip utilizes magnets to scrub algae from the inside of aquariums. Unlike the traditional cleaners, the Mag-Flip comes with a scraper on the reverse side.

## unique benefits

Use the pad side of the Mag-Flip to clean your aquarium on a regular basis. To remove more stubborn algae, simply flip the Mag-Flip and use the scraper. This is done by separating the outer magnet from the glass and rotating it 180° to reverse the magnetic pole. Place the outer magnet on either side of the inner magnet and slide it towards the inner magnet until it flips.

The Mag-Flip features neodymium magnets that provide high tract force to power away stubborn algae. Its unique, low profile design allows it into tight spots and to maneuver around aquarium decorations that are close to the sides. The Mag-Flip is available for glass and acrylic aquariums.
