Pond Fountain Selection Guide

Drs. Foster & Smith Educational Staff

fountain finder

From simple bell to dazzling blossom, the right fountain display can add a beautiful focal point while providing added benefits for your pond. Surface agitation helps raise oxygen levels, lower ammonia levels and cool your pond. Higher oxygen levels decrease algae growth and help your fish breathe easier. Finding the ideal fountain is easy: 1) pick a pattern that is appealing to you, 2) choose what type of system best fits your needs; a pump with fountain head, a pump with filtration and fountain head, floating fountain, or just add a fountain head to a pump you already have.

Bell

Trio Pond Fountain Set
