

Drs. Foster and Smith Cat Beds

Drs. Foster & Smith Educational Staff

Your cat leaves no household surface unscathed in her search for perfect sleep. Wicker baskets, a sun-kissed sofa table, even an open drawer lined with sweaters – she's tried them all. Hiding is second nature, and all cats need a private, secure place to sleep.

Observe your cat's habits carefully to see what she prefers, whether she likes to burrow into blankets, crawl inside cozy quarters, or snuggle into something incredibly soft. Then, try one of our beds. Each delivers the snuggly comfort she craves and measures up to the high quality standards you expect. Just look for our logo.

Nesters

For cats that prefer the security of enveloping walls, [Nests](#) are ideal. They're perfect for pets who curl up when they sleep. Your cat rests upon, and is surrounded by, a soft yet supportive sleep surface and an incredibly soft lining.

Blanket Burrowers

For cats that love to go under the covers, [Hide-a-Way Bed](#) is a bed and blanket all in one. She'll crawl under the attached blanket "roof" and rest peacefully upon the thick MiracleLoft® cushion with zippered liner and cover.

Sink-In Snugglers

Sometimes, it's the things you can't see that make a great bed. When your cat snuggles into one of our cradling [Slumber Balls](#), it's the exclusive MiracleLoft® polyfil inside that keeps her coming back. Our special manufacturing process "bends" the polyfil fibers several more times per inch than our competitors' polyfil. That means it resists compressing beautifully.
