

Clippers & Horse Trimmers: Compare

Drs. Foster & Smith Educational Staff

Electric equine clippers and trimmers are must-have tools if you plan on doing your own horse grooming. In general, use clippers for entire body grooming. Use trimmers for precision trimming around the face, ears, hooves, and tail of your horse. If you want one tool to do both jobs, choose a multiple-speed clipper that can be used dually as a clipper and trimmer. More powerful clippers with extra strong blades work best for horses with thick, long, or damp coats.

	Recommended Usage	Blade*	Cord Length	Speeds	Strokes Per Minute (SPM)	Unit Length
Oster Clipmaster Clipper Kit	Adjusts to alternate between full-body clippings and professional trims.	Titanium	15 foot	Variable	700 to 3,000	13"
