Electrolyte Supplements for Horses: Compare

Drs. Foster & Smith Educational Staff

A proper electrolyte balance and hydration should be main concerns of a horse owner. Electrolytes are required for fluid balance in cells. Electrolytes such as sodium (chemical symbol Na) and potassium (K) are essential for muscle function, which affects both skeletal muscles and the heart. Other electrolytes are responsible for other functions of the body.

Na= Sodium | K = Potassium | Ca = Calcium | Mg = Magnesium | Ph = Phosphorus

Product/ Serving Size	Form/ How to Feed	Na (mg)	K (mg)	Ca (mg)	Ph (mg)	Mg (mg)	Amino Acids
Apple-Dex by Farnam (2 oz)	Powder, as is or mix w/ water	15,590	6237	284	-	227	-
Apple Elite by Farnam (2 oz)	Granules, as is or mix w/ water	15590	6237	284	-	227	-
Stress-Dex by Neogen (1 oz)	Powder, as is or mix w/ water	703	852	341	227	-	-
Electro-Plex Gel by Durvet (34 g)	Gel, as is	244	Y	Y	-	Y	Y
Platform Complete Electrolytes by Farnam (1 oz)	Nugget, as is	2570	1704	270	-	500	Y
AccuLytes by Vita-Flex (1.5 oz)	Powder, as is	4303	1321	826	102	349	-
