

SmartBones Dog Treats: Smart Alternative to Rawhide Dog Bones

Drs. Foster & Smith Educational Staff

Smart Bones are everything their name suggests. They are a smart alternative to rawhide bones, offering the same hard texture and oral-health benefits - without actually containing any rawhide. Concerns with digestibility are a thing of the past - SmartBones are 99% digestible and preferred by 9 out of 10 dogs over rawhide/meat chews. Not since Dingo Rawhide was introduced 10 years ago has there been such an exciting, unique product on the market.

SmartBones are made using extruded, wholesome, grain starch and vegetables like sweet potatoes, carrots and peas - with an inner ribbon of irresistible chicken jerky.

- 100% rawhide free
- 99% digestible!
- Preferred by 9 out of 10 dogs over rawhide/meat chews
- Available in chicken, dental, & peanut butter flavors

SmartBones FAQ

Over 99% digestible. What does that mean?

Digestibility Studies are quite complex and are carried out in accordance with a strict protocol established by AAFCO (Association of American Feed control Officials), and by Kennel facilities registered with the

USDA under the Animal Welfare Act.

In its most basic form, the study requires feeding specific dogs only dog food and measuring what goes in and what comes out and then repeating it with the same dogs but adding the treats to the dog food. All output is lab-analyzed for protein, fat and caloric digestibility.

Our standards required more than two years of formulation and re-formulation to finally achieve a 99.2% digestibility - a testament to the high standards and the quality of the ingredients we use. To put this in perspective, even the best dog foods achieve only 85% total digestibility. You can rest assured that your dog will get maximum nutritional value from [SmartBones](#) chews. Side Benefit: Smaller stools. Smart Bones for Smart Dogs.

Preferred by 9 out 10 dogs over the leading rawhide chews.

For palatability testing, we used the leading rawhide dog chew on the market - again using a strict protocol - one of each treat is offered to a dog in a left and right bowl on one day then the bowl placement is reversed on the second day. Out of the 20 dogs, 18 dogs chose the SmartBones chew first on both days, and the other 2 dogs chose [SmartBones](#) chew on one of the days so they were judged to show no preference; hence 9 out of 10. This is very convincing data, but in practice we guarantee that you will find that unlike dogs who simply try to pull hidden treats out of other rawhide products and leave the rawhide un-chewed, your dog will chew and eat all of the SmartBones chew.

Why is it important for my dog to chew anyway?

Historically, in the wild, dogs used to tear through the skin of a wild beast to get at the meat, cleaning their teeth naturally in the process. But today's domesticated dogs eating kibble in a bowl never gets this exercise, and as a result, their canine teeth become disused and plaque can buildup. Ask any dental hygienist and they will tell you about how poor dental health even in pets can result in infections, kidney and heart diseases, let alone bad breath. Acids in the mouth can damage the gums resulting in gingivitis which in turn can lead to periodontitis - the leading cause of tooth loss. In addition, all dogs have an inherent desire to chew, especially puppies. Destructive chewing is often the result of a normal desire to chew and to relieve boredom. Over the years, we have found that dog chews are an effective alternative to your furniture and shoes.

These aren't like other chews I've seen. Are SmartBones chews patented?

Yes. In December, 2009, the US Patent and Trademark Office awarded us a Patent # 7,677,203 for one of the decade's most

innovative and unique advancements in the Dog Chew category.

How many SmartBones chews should my dog have each day?

Dog chew consumption is size-dependent but it is appropriate to feed 1-2 [SmartBones](#) chews of the correct size daily.

Bone Size	Dog Size	Calories
Mini 2.5"	5-10 lbs	45
Small 5"	11-25 lbs	150
Medium 5.5"	26-50 lbs	230
Large 7"	over 50 lbs	320
