

Healthy Dog Food: Country Classic Dinners

Drs. Foster & Smith Educational Staff

savor

your pet's health
is our passion.

The newest breed of dog and cat food tastes like it was served from the kitchen table. Our new [Country Classic Dinners](#)® are delectable

meals that contain choice meats, vegetables, and fruits, all enveloped in a savory sauce. The result is a wholesome, natural meal fortified with all the nutrients, vitamins, and minerals your pet needs for optimal health - and mouthwatering delicious taste.

The taste of home

Our home-style pet foods turn the table on gourmet meals. Each dinner is loaded with natural ingredients for the ultimate nutrition, aroma, and flavor. The thick cuts of meat are hand-picked and carefully cut. The fruits and vegetables are each picked at the peak of freshness and flavor.

Cooked with care

Not

Not all pet food is created equal. However, today's pet owners have a selection of pet food much more appealing and nutritious than the table scraps of

High quality ingredients are only the first step. Unlike the manufacturing processes that strip away much of the nutrients and goodness, home-style canned foods are not dried or pre-processed. Since the ingredients start fresh and are simmered or slow-cooked to perfection, the integrity of each ingredient is rich in natural vitamins, minerals, and proteins, as well as a balance of beneficial fats and carbohydrates. In addition, only natural preservatives, such as Vitamins E and C, guarantee goodness, taste, and nutrition.

Perfect presentation

Bargain pet food is one of the culprits behind decreased energy levels, digestive problems, and a host of other illnesses. By contrast, our home-style meals boast increased palatability, no artificial preservatives or questionable ingredients - just natural goodness that's vitamin- and

mineral-fortified.

Healthy for your pet. Delicious. Your pet will prove it to you.

yesteryear. Today's wide variety of pet foods typically falls into four major categories:

- **"GROCERY STORE" FOODS** - made with less-digestible, inexpensive ingredients. Often lack proteins and are laden with artificial flavors, colors, and preservatives.
- **PREMIUM FOODS** - made with better-quality, more-digestible ingredients. Usually boast higher protein levels and may be fortified with vitamins and minerals.
- **HEALTHY FOODS** - made with fresh fruits and vegetables, real meats, and carbohydrate-rich grains for optimal health. Usually fortified with vitamins and minerals and free from artificial preservatives, colors, and flavors.
- **HOME-STYLE FOODS** - made with wholesome ingredients, including chunks of real meat and fresh vegetables and fruits, often enveloped in a savory sauce. Vitamin- and mineral-fortified. These natural meals boast optimal nutrition, digestibility, and palatability.
