

Spring Birdwatching Favorites: Customer Testimonials

Drs. Foster & Smith Educational Staff

wildbird CUSTOMER FAVORITES

Metal House Oriole Feeder

"I really look forward to the migrating orioles in the spring, and orioles seem to find this feeder year after year. Last year we counted 5 of them feeding at the same time! I think the bright orange color and fresh fruit

slices really catch their attention. The durable powder-coated steel construction allows this feeder to maintain its beauty and durability, year after year."

Peyton Pitterle - Iowa City, IA

"Bat"chelor Pad Condo

"I used to be afraid of bats, but overcame my fear and ordered this bat house to help control the incredible amount of mosquitoes in our backyard. I did not want to use chemicals to control mosquitoes because I have small children and dogs that are

constantly outside. The free book that you get with this house has really changed my opinion about bats, too. It explained that they're actually friendly. We can enjoy

being outside without being eaten by mosquitoes and my children learned something too!"

Alex Roque - Rhinelander, WI

HummZinger Excel

"Spring and summer are my favorite times of year and I especially look forward to hummingbirds visiting my feeders. However, the feeder I was using was causing me more frustration than fun. Ants and

bees were constantly invading the feeder and I could never figure out how to keep them away. I purchased the HummZinger Fancy from you and it is perfect! The bright red color attracts many hummingbirds, but the ant moat and bee guards keep annoying insects out! Finally, a feeder that both hummingbirds and I can enjoy!"

Addison Winkler - Bristol, TN

Squirrel Be-Gone III Triple Tube Feeder

"This feeder really does work! The weighted perches keep squirrels out and allow birds to eat. I can't tell you how many times a week I was filling my feeders because the squirrels

were stealing the seed. I bought this feeder from you and now I'm filling the feeder because the *birds* are finally getting to eat! The squirrels can't get to the [seed](#) and have given up trying! The metal detailing looks beautiful too."

Vivian Janowiak - Kansas City, MO

Never Melt Suet

"I love watching nuthatches and woodpeckers at my [suet feeder](#), but the suet never seemed to last long in the hot sun. These suet cakes seem to stand up to the summer heat so we can enjoy birdwatching all year long. Thank you for carrying them!"

Nikki Puchta - Springfield, IL

Finch Flocker Tube Feeder

"This feeder is awesome! Goldfinches are one of my favorite birds and they look even more spectacular when they eat in flocks. This feeder allows many of them to feed at the same time, increasing their beauty. In fact, I had so many goldfinches at my 15" feeder, that I purchased the 36" feeder too! My yard is filled with beautiful song and bright color every day. I've had my feeder out constantly for a couple of years and it looks as good now as it did the day I put it out."

Collett Mitchell - Green Bay, WI
