

## Bird Feeders: Large Capacity Comparison Chart

Drs. Foster & Smith Educational Staff

# LARGE CAPACITY FEEDERS

compare by price and features

If you have to refill your wild bird feeders often, an ideal alternative is to set up feeders that offer [larger capacity](#). After all, a feeder that is frequently empty will force your birds to someone else's feeder.

So, you may ask, what is considered a large capacity feeder? For the sake of comparison, we've chosen our mixed seed feeders that offer capacity of at least 3 quarts and thistle feeders that offer capacity of at least 1 quart. When you

select one, you will refill less often, and still get the style and features you enjoy with smaller feeders. And, you'll find one in your price range, too.

### \$10 - \$25

Feeder	Capacity	Special Features	# Perches	Attracts
 <a href="#">Droll Yankees 15" Finch Flocker</a>	1 quart	Internal baffle ensures all seed is emptied into ports to prevent rot.	6	Finches and other birds that eat thistle seed

### \$25 - \$50

Feeder	Capacity	Special Features	# Perches	Attracts
--------	----------	------------------	-----------	----------

 <a href="#">Green Steel Magnum Sunflower Feeder (SR)*</a>	4 quarts	Extra-wide lid, all-metal construction	None; circular base lets birds perch	Smaller cling feeding and perching birds, like chickadees, nuthatches, woodpeckers, finches, cardinals, and more
 <a href="#">Droll Yankees 36 inch Finch Flocker</a>	2-1/2 quarts	Several seed ports, inner seed baffle directs all seeds to ports	20	Finches and other birds that eat thistle seed
