your dog's **electronic butler**

benefits of automatic feeders & waterers

Are you constantly filling your dog's food and water dishes? Is your pet on a portion control diet? Does your dog crave tastier water? An automatic feeder or waterer is the answer to all your pet food and water delivery needs.

[Automatic feeders](#) are the simplest way to ensure your pooch never misses a meal. They are especially helpful for people with hectic schedules and ideal for dogs on veterinarian-recommended diets. The programmable [LeBistro Electronic Feeder](#) holds an amazing 5 lbs of food, yet dispenses measured portions at intervals you determine. Some, like the [2-Portion Automatic Feeder](#), can even serve [wet foods](#). Any of our [Signature Series Dog Foods](#) are a great choice for the health conscious pet owner.

Similarly, [automatic pet fountains](#) help keep your dog's water dish full of clean water. Many, like the [Drinkwell Platinum](#), continually circulate water through a multi-stage filter to remove impurities, inhibit bacteria growth, and add aeration for taste and freshness. Best of all, most take water as needed from a large reservoir to help ensure your pooch is never thirsty.

Both types of automatic feeders and waterers eliminate feeding hassles. In fact, using each is like hiring a team of butlers to specifically cater to your dog's mealtime needs – at a price everyone can afford!
