Checklist for Cat Travels

Drs. Foster & Smith Educational Staff

Will your cat accompany your summer travels? Use this handy checklist to keep your cat comfortable and safe:

- Carrier
 Use a durable design with three or four sides of ventilation. The <u>carrier</u> should be large enough to hold a small litter box. Models that secure to your vehicle's seat add additional safety.
- Litter Box
 Disposable litter pans are a great alternative if you cannot bring one of your cat's normal boxes.
- Halter & Lead
 Keep an H-style or Figure-8 harness, connected to a suitable lead, on your cat at all times. A current and legible nametag is also essential.
- Vaccination Records
 A current <u>list</u> of your cat's vaccinations and any medications he may be taking is required in many states. Check your destination state's rules regarding importing animals.
- Flea & Tick Protection

 Use a suitable topical to help prevent parasite infestation while traveling.
- Food & Water
 Bring extra food and water. Both travel well in empty and washed food-grade gallon jugs. Keep an extra set of dishes on hand.

Toys Occupy your cat's time in his carrier or at hotels with a few of his favorite toys.

Nametags
Have new ones made with cell number and destination address. They're inexpensive.
