

Improve Aquarium Diet with Frozen Fish Food

Drs. Foster & Smith Educational Staff

When it comes to fish nutrition, the fresher the better. But if you don't live on the ocean or produce colonies of brine shrimp at home, fresh [frozen fish food](#) is a great alternative.

As your premier source for frozen fish foods, we offer a huge selection of frozen foods you won't find at your local pet store. In addition, you may notice frozen fish food is easy on your pocketbook.

Because it is frozen, it has a longer shelf life, and is often available in bulk at a significant cost savings to you. On top of that, you enjoy quantity discounts when you buy six or more at a time for even MORE savings!

Not only is frozen food a wise choice economically, it is also:

- **NUTRITIOUS:** Frozen fish food is full of nutrition. Unlike dried flake foods, frozen foods such as shrimp, squid, or scallops are captured fresh and frozen immediately to preserve their nutritional value at its peak.
- **NATURAL:** Watch your fish actively pursue frozen food items just as they would natural prey. Frozen food retains its natural shape and color, and can help trigger an instinctive feeding response in piscivorous (fish eating) fish. If you haven't offered frozen foods to your fish before, you will be amazed at the difference.
- **EASY TO SUPPLEMENT:** It's easy to further enhance the nutrition of frozen foods with [liquid garlic](#) or [other supplements](#) - simply soak the frozen food in the supplement, wait for it to thaw, and then feed!
