

How to Create Custom Treat Blends

Drs. Foster & Smith Educational Staff

Our single ingredient seed, fruit, and nut selections allow you to create a treat blend with your bird's favorites, just like our Build-Your-Own-Toys! By creating your bird's own custom blend, you give your bird what she likes with no fillers and less waste. Now that's a money-saving idea!

-  Have a bird who adores tropical treats, like a Caique? Try a blend with dried fruits of the rainforest like [papaya](#) and [pineapple](#).
-  Does your bird prefer a certain seed or grain? Use our [oats](#), [millet](#), or [cracked corn](#) to give your bird a treat he'll love.
-  Bigger birds, with their strong beaks, appreciate nuts they can hold and break open, like [walnuts](#) and [Brazil nuts](#). Create a mix that includes these for your Macaw.
-  Smaller birds, like parakeets, prefer softer shelled nuts or ones that are easily opened, like [pine nuts](#) or [pistachios](#).
-  Want to add some vitamins and minerals to your bird's diet, naturally? Add some [fruits and nuts](#), packed with nutrients.

Doctors' Foster and Smith [seeds, fruits, and nuts](#) are all of the finest quality and are packed and sealed to ensure that your bird is getting the very best.
