

Anxious Pup Calming Aids

Drs. Foster & Smith Educational Staff

Pets become stressed for many different reasons - travel, unfamiliar guests in the house, being separated during your absence, loud noises like thunder or fireworks, or even from sensing their owner's mood swings. Because your pet is sensitive to his physical and emotional environment, he may occasionally act out in response with excessive barking, inappropriate elimination, or even destructive chewing, scratching, or aggression. Fortunately you can help your pet deal with stress by lessening the root causes of the stress, and, as needed, using stress relievers.

Choosing the right stress reliever

Every pet responds differently to these natural products, so if you find that your pet doesn't respond well to one, consider trying a different product. The right choice for your pet is the one he will readily accept.

Product	Product Type	Active ingredients	Use
 <p><u>Comfort Zone Plug-In</u></p>	Air Diffuser	Dog Appeasing Pheromones (D.A.P.) mimicking a new mother's natural pheromones	Continuously treats the air supply of the entire room to give your dog a sense of well-being. Excellent for pets with mild separation anxiety or chronic stress. Odorless and non-toxic. Not a drug or tranquilizer. Also available in a <u>spray</u> form.
 <p><u>Rescue Remedy</u></p>	Liquid Drops	HPUS 5x dilution of Helianthemum nummularium, Clematis vitalba, Impatiens glandulifera, Prunus cerasifera, and Ornithogalum umbellatum.	Natural relaxant. Calms without making your pet overly sleepy. Can be placed in mouth or disguised in food or water. Administer 30-60 minutes prior to the stressful situation

 <p><u>Ultra-Calm® Bites</u></p>	Treat	Herbs including valerian extract, inositol, and soothing chamomile; fortified with Vitamin C	Natural relaxant for event related stress: trips to the veterinarian, dog shows, and storms. Delicious beef liver flavored biscuit. Easy to administer.
 <p><u>Ultra-Calm® Tablets or Chews</u></p>	Tablet or Treat	Passion Flower Extract, Valerian Root Extract, Ginger Root Extract, Milk Protein Hydrolysate, Niacin, Pyridoxine Hydrochloride (Vitamin B6), and Thiamine Mononitrate (Vitamin B1)	Use as needed before travel, thunderstorms, or trips to the veterinarian or groomer.
 <p><u>Composure SoftChews</u></p>	Soft chew	Thiamine (Vitamin B1), C3™ (Colostrum Calming Complex), L-Theanine (Suntheanine® brand)	For use before anticipated periods of stress or for pets exhibiting nervousness and hyperactivity.
 <p><u>Pet-Ease™ for Dogs</u></p>	Soft chews or tablets	Bio-Calm Complex (propriety blend of Chamomile, Hops, Ginger, Tryptophan and Taurine)	Natural blend of herbs and amino acids helps maintain your dog's contentment during separation, travel, motion sickness, storms, grooming and changes in routine.
	Air	Calming pheromones	Plug-in pheromone diffuser helps modify stress- and fear-related behavior problems.

Veterinary Options

For a severe case of separation anxiety, your veterinarian might suggest a prescription anti-anxiety medication such as clomipramine, along with behavior modification training exercises. These combined treatments are effective in treating severe separation anxiety. The medication helps your dog relax so he can concentrate on the behavior modification training exercises; the training is what actually changes the dog's response to a stressful situation.
