

Benefits of Birdbaths

Drs. Foster & Smith Educational Staff

If you enjoy wild birds in your yard, birdbaths are a must. Birds absolutely require bathing to keep feathers clean and flexible and to maintain healthy skin and plumage. Birdbaths provide a safe place for wild birds to bathe as well as a reliable source of clean drinking water.

Birdbaths offer you benefits, too! Birdbaths draw a variety of entertaining birds - including non-feeders - to your yard, and they can be a lovely focal point for a backyard setting. Plus, fountains with moving water provide a peaceful, soothing sound.

Cleaning your birdbath is essential to the health and safety of the birds that use it, and it keeps your birdbath free of unsightly stains and odors. A number of easy-to-use products simplify birdbath maintenance. Here are just a few products designed to keep your birdbath clean and healthy:

- [Water Wiggler](#) - Keeps water in motion to prevent stagnation and excessive algae buildup.
- [Bottle & Tube Brush Set](#) - Makes scraping away dried messes easy.
- [Microbe-Lift Birdbath Clear](#) - Prevents buildup of organic debris and hard water deposits.
- [Birdbath Water Cleaner](#) - Prevents stains and mineral deposits.
- [Birdbath & Statuary Cleaner](#) - Removes stains quickly and prevents discoloration.
- [Poop-off Cleaner](#) - Removes tough messes in seconds with one squirt.
