Bravecto Topical Solution For Cats

Generic products are not available.

Storage
Store at or below 86°F. Store in original package. The pouch should only be opened immediately prior to use.

Uses
Bravecto Topical Solution for Cats kills adult fleas and is indicated for the treatment and prevention of flea infestations and the treatment and control of *Ixodes scapularis* (black-legged tick) infestations for 12 weeks in cats and kittens 6 months of age and older, weighing 2.6 pounds or greater. Bravecto Topical Solution For Cats is also indicated for the treatment and control of *Dermacentor variabilis* (American dog tick) infestations for 8 weeks in cats and kittens 6 months and older and weighing 2.6 pounds or greater.

Dose and Administration
Always follow the dosage instructions provided by your veterinarian. If you have difficulty administering the product, contact your veterinarian.

Bravecto Topical Solution For Cats should be administered topically as a single dose every 12 weeks according to the Dosage Schedule included with the product. Bravecto Topical Solution For Cats may be administered every 8 weeks in case of potential exposure to *Dermacentor variabilis* ticks.

Treatment with Bravecto Topical Solution For Cats may begin at any time of the year and can continue year round without interruption.

This product should only be given to the pet for whom it was prescribed.

Possible Side Effects
Potential side effects include vomiting, itching, diarrhea, hair loss, decreased appetite, and lethargy. Consult your veterinarian if you notice any of the above side effects.

If your pet experiences an allergic reaction to the medication, signs may include facial swelling, hives, scratching, sudden onset of diarrhea, vomiting, shock, seizures, pale gums, cold limbs, or coma. If you observe any of these signs, contact your veterinarian immediately.

Precautions
For topical use only. Avoid oral ingestion.

Not for use in animals hypersensitive (allergic) to fluralaner.

The safety of Bravecto Topical Solution For Cats has not been established in breeding, pregnant, or lactating cats.

Use with caution in cats with a history of neurologic abnormalities.

Do not contact or allow children to contact the application site until dry.

The product is highly flammable. Keep away from heat, sparks, open flame or other sources of ignition.

Drug, Food and Test Interactions
There are no known contraindications for the use of Bravecto Topical Solution For Cats. As with any medication, notify your veterinarian of any other medications, including vitamins and supplements your pet is taking while your pet is receiving Bravecto Topical Solution for Cats.

Signs of Toxicity/Overdose
If you know or suspect your pet has had an overdose, contact your veterinarian immediately.

Keep this and all other medications out of the reach of children and pets.

This information may not cover all possible uses, directions, side effects, precautions, allergic reactions, drug interactions, or withdrawal times. Always consult your own veterinarian for specific advice concerning the treatment of your pet.
